

## Day Camp with Remote Virtual Learning Accommodations

In response to many of our local schools being closed to begin the school year, we are excited to announce the addition of learning stations where students can virtually participate in their online school curriculum in addition to taking part in our gymnastics day camp program.

We are adding individual learning stations that will provide students with socially-distant working areas and an ideal learning environment. Staff members will be prepared to assist students with any technical troubleshooting and monitor students' activities to minimize distractions. We know that many families are faced with the challenges of schools being closed to begin the school year and we hope that you consider us as a temporary home for learning in addition to our best-in-class activities that you rely on us for.

Like all of our camps, this camp adheres to the highest standards of safety. We have taken every measure possible to ensure the health and safety of your children, including supporting social distancing across our facility, adding layers of strict cleaning and disinfecting measures, promoting healthy hygiene practices and training staff members on new protocols.

### Program Features:

- Socially-distant individual learning stations spaced more than six feet from one another providing an optimal learning environment with ample lighting and high speed wireless internet.
- Health Screening and Temperature Check: all staff and children will be monitored daily for signs and symptoms of COVID-19.
- Installed Spot TV™, the Industry's #1 camera system and streaming app uniquely designed to share live, secure remote viewing.
- Trained staff members on proper cleaning and disinfecting procedures, as well as proper usage of PPE. Dedicated teams for cleaning all surfaces.
- Increased frequency of enhanced deep cleaning procedures using a sanitization, deodorizing and cleaning product called Tersano. Tersano kills germs in 30 seconds to 1 minute and is 100% chemical and toxic free. This means we can keep the gym open while we continuously clean throughout the day.
- Increased mandatory staff and student handwashing utilizing new touchless soap and towel dispensers.
- Mandatory face coverings for all staff, students and guests.
- Limited guest capacity at the facility.
- Rotation schedules created with the intention of accommodating physical distancing guidelines.
- Staff exercised No Spot Training during gymnastics activity: staff will refrain from using hands-on spotting, except when intervening to keep the child safe.
- Introduced education signs throughout the center: Signs advocating proper hand hygiene, avoiding sharing personal items, cough etiquette and physical distancing posted throughout the facility.
- Staggered activity start/finish times and the utilization of multiple entrances/exits to reduce the amount of people in any given area.
- Instructed staff members in our new COVID-19 Incident Response Protocols to ensure we have the quickest and safest reaction to any possible exposure.

With our new learning stations, students can virtually participate in their online school curriculum in a safe environment when home schooling is not an option.
